5. Card Tokenization and NFC Mobile Payments

- 5.1. NFC mobile payments are contactless payments made through the Bank's My Ameria app (hereinafter in this chapter the "App") or any other system (hereinafter in this chapter the "System") provided by another company and installed on a mobile device. To make an NFC payment, link your card to the App or the System and create the tokenized equivalent of the card (hereinafter the "Tokenized Card").
- 5.2. You may tokenize one or more cards at a time in the App or the System on one mobile device.
- 5.3. You may tokenize the same card in the Apps or Systems installed on various devices.
- 5.4. The App and the System will run and the card tokenization in your mobile app will be enabled solely if your mobile device has any active unlock security feature (fingerprint, Face ID, etc.).
- 5.5. The App will run on IOS and Android mobile devices with IOS13 and higher and Android 6 and higher operating systems supporting NFC technology. The System will run on the NFC-equipped mobile devices meeting the requirements of the System providers.
- 5.6. Security of your card data in the card tokenization process is guaranteed by respective payment system, depending on your card type.
- 5.7. Tokenization is possible for Visa and Master (not available for tokenization using the App. on Android-based mobile devices) cards issued by the Bank (other than Gift, Business and Cirrus Maestro cards).
- 5.8. You can make NFC mobile payments in any shopping center around the world that accepts the specified payment cards and has contactless POS-terminals.
- 5.9. To make an NFC mobile payment:
 - 5.9.1. unlock the mobile device and the System/App using the respective unlock feature (fingerprint, Face ID, PIN, etc.), and hold the mobile device close to the POS terminal (for mobile devices running IOS operating system),
 - 5.9.2. unlock the mobile device using the respective unlock feature (fingerprint, Face ID, PIN, etc.), open (activate) the System/App and hold the mobile device close to the POS terminal (for mobile devices running Android operating system) Note, if you make maximum 5 (five) transactions a day for the amount up to AMD 20,000 on the territory of Armenia and the System/App is active on the mobile device at the moment, you can simply activate the screen of the mobile device (without unblocking the mobile device) and hold the mobile device close to the POS terminal. Outside Republic of Armenia, these limits are regulated by the respective payment system, based on the terms and rules adopted for the respective country. Furthermore, you should close the App (log out) after each use of the App or unlink the card when using the System so that the possibility to perform transactions with a tokenized card is considered inactive without unblocking the mobile device.
- 5.10. In case of transactions with tokenized cards, use of PIN code depends on the POS terminal accepting the payment and is regulated by the terms and rules of the respective payment system defined for the given country. At the same time, if a digital card of the Bank has been tokenized, the devices and transactions that require a PIN code are not accessible for such card.

- 5.11. Cash withdrawal transactions with tokenized cards are not available.
- 5.12. NFC mobile payments and other transactions using a tokenized card and authentication data (upon request) are equivalent to card-present transactions. The Cardholder shall bear the same responsibility for the payments made with the tokenized card stipulated herein, as applies to card-present transactions.
- 5.13. Before card tokenization in the App or the System, you should make sure that only your biometric identification data are registered in the mobile device or the app (fingerprint, facial recognition, etc.), since only such data will be used for verification of transactions with tokenized cards. Where the biometric data (fingerprint, facial recognition, etc.) of other persons are used for identification in the mobile app or for access to the mobile device or for making transactions in the App or in the System, such data will be considered your identification biometric data, and the entire responsibility for the completed transactions will be borne by you. You must make sure that your identification (authentication) data are kept safe at a place which cannot be accessed by any third party.
- 5.14. The App may run without Internet connection provided that the tokenized card keys have been exchanged. When there is Internet connection, the tokenized card keys will be automatically exchanged (recharge of token numbers) on the 27th day. Hence, to make payments with a tokenized card, you need to have Internet connection at least once in every 27 (twenty seven) days.
- 5.15. The procedure for disputing transactions with a tokenized card is the same as for card-present transactions described herein.
- 5.16. In case of loss of the mobile device, or theft of your identification (authentication) data, or their availability to other persons, contact the Bank immediately to block the tokenized card. If you fail to do this, the Bank shall not be held liable for any transactions made with a tokenized card.
- 5.17. If the card is blocked, it may not be tokenized.
- 5.18. If your physical card is blocked, you won't be able to make transactions with the tokenized card linked to such blocked card.
- 5.19. Should you block your tokenized card, your physical card will remain unblocked.
- 5.20. Any provisions herein contained with respect to the tokenized cards will apply only in connection with tokenized cards and card tokenization by you. The mobile device and the System provider, the mobile operator and other websites and third party service providers connected to the System have their agreements and terms and conditions in place that you should comply with. So, you should provide your personal data to the specified person, use their services or visit the respective website only if such terms and conditions and the settings stipulated by the agreements are acceptable.
 - 5.20.1. The Bank shall not be held liable for the security of the mobile device and the services offered by the System provider or a third party, their accuracy, lawfulness, usability and uninterrupted operation and any other matter related to their use.
 - 5.20.2. Before tokenizing the card in the System, you must familiarize yourself with the conditions of the agreements of involved third parties.
 - 5.20.3. The Bank shall not be liable for and shall not provide any assistance in relation to any products and services of any third party, whether hardware or software related (including the mobile device and the system installed there), etc. In case of any issues or queries in relation to the products and services of the third parties, and personal details provided to them, you should contact directly such third parties to get the required support and assistance. In case of any questions in relation to the use of the System (other than issues related to the tokenized card), you should contact directly the support service maintaining the System.
- 5.21. Access to the tokenized card, its use and service depend on the scope of services provided by the operator of the System or the mobile service. The Bank is an operator neither of the System services nor of the network and doesn't oversee their actions. The Bank shall be responsible to you for any circumstance that can terminate, impede or otherwise affect the use of the tokenized card, disrupt the process of transactions with the specified card, including the cases of unavailability of the System or the mobile connection, slow telecommunication, slow network, limitation of the coverage of the mobile communication, communication failures and lock-outs.
- 5.22. Use of a tokenized card implies that you will provide your personal details electronically via the communication means of a third party. Since the Bank doesn't operate or supervise any such communication service, the Bank can't guarantee confidentiality or security of such data transfer. Moreover, your mobile device is initially configured by your mobile operator.
- 5.23. With respect to the personal or confidential information sent to or received by the Bank, the Bank will be entitled to restrict such connections depending on the security level, which will be determined at the Bank's discretion in accordance with its security criteria. Furthermore, the Bank shall not be held liable for failure to exercise the right stipulated in this clause.
- 5.24. By accepting these terms and conditions, you give your consent to receiving notification from the Bank or the System operator about the status of the services via the following communication channels: email, SMS, push notifications, the App or the System notification.
