3 Miscellaneous

Provision of loans

To get a loan you can visit any branch office of the Bank.

The loan is disbursed via crediting to the account

Loans, lines of credit, overdrafts, purchase order finance, etc. can be provided for any reasonable term not shorter than 1 month.

Interest Calculation

Interest is calculated at nominal interest rate based on outstanding loan. The calculations are based on a 365-day year. Annual percentage rate (APR) shows the cost of loan in case of proper and timely performance of obligations under the agreement. The annual percentage rate is calculated on the basis of the underlying components, is indicative and can change during the Agreement term due to early repayment of loan by the borrower or change of the components included in its calculation.

APR is calculated by the following formula:

$$A = \sum_{n=1}^N \frac{K_n}{(1+i)^{\frac{D_n}{365}}}$$

where

A – amount of loan (principal amount provided by the lender to the borrower)

n – sequence number of payment

N – sequence number of the last payment

Kn – amount of the nth payment

Dn – period between the day of provision of loan and the day of the nth payment, expressed in days

i – annual percentage rate, calculable if other input data are known from loan agreement or otherwise

Interest Calculation: Representative Example

Loan principal: AMD 7,000,000

Annual interest rate: 15%

Loan term: 60 months

Daily interest will make: 7,000,000*15/100/365=2,876.7

Interest on credit lines/overdrafts is accrued on utilized amount on daily basis. Non-utilized amounts can also bear interest.

Change of nominal rate

The Bank is entitled to review and change the interest rate and lump-sum disbursement fee during the term of loan agreement, based on interest rate fluctuations on funds borrowed and/or allocated by the Bank on the financial market and/or if there are real preconditions for changing the interest rate. In either case, we will give you notice 30 days in advance.

Loans in foreign currency

ATTENTION!

Exchange rate changes can affect the amount of loan payments.

When calculating annual percentage rate it should be taken into account that payments of loans in foreign currencies are made using funds on accounts in that currency, or, where the funds are insufficient, other accounts in any other currency. Exchange is performed at the rate effective in the Bank at that moment, therefore the annual percentage rate can change depending on changes in the exchange rate of the given currency.

ATTENTION!

IF YOU FAIL TO PERFORM YOUR PAYMENT OBLIGATIONS WHEN DUE OR DO NOT PERFORM THEM PROPERLY, OVERDUE AMOUNTS SHALL BEAR FINES AND PENALTIES AS DEFINED BY AGREEMENT, AND THE INFORMATION ABOUT YOUR OVERDUE LIABILITIES WILL BE REPORTED TO CREDIT BUREAU WITHIN 3 BUSINESS DAYS. ATTENTION!
